# PARKING ASSISTANT PROFESSIONAL

Parking Assistant Professional offers features to help maneuver your vehicle into parking spaces automatically. Just guide your MINI to where you wish to park. When ready to park, use the built-in parking features or the MINI App on your smartphone to remotely park your vehicle.

## KEY FEATURES

Parking Assistant Professional includes features to help make parking a more comfortable experience including Automatic Park Assistant Professional, Remote Control Parking, Back Up Assistant Professional, and Maneuver Assistant.

The advantages of Parking Assistant Professional include:

- Greater comfort thanks to automatically maneuvering in parking events
- Ability to perform parking maneuvers remotely

**AUTOMATIC PARK ASSISTANT PROFESSIONAL:** Use of surround view camera system which allows the driver to park in spaces with either partially marked lines or fully marked lines regardless of vehicles in parking spaces nearby.

**REMOTE CONTROL PARKING:** Allows the driver to remotely park the vehicle through the MINI App.

**BACK UP ASSISTANT PROFESSIONAL:** Offers extended range for automatic reverse of the previously driven path.

**MANEUVER ASSISTANT:** Offers the ability to record and replay routes using surround view cameras and obstacle detection. The vehicle is able to drive recorded routes automatically while you are sitting in the car or remotely control the vehicle.

Disclaimer: Use of the Parking Assistant Professional systems does not remove the responsibility of the driver to assess visibility, traffic conditions and to intervene when needed. The driver should always use caution to reduce the risk of accidents.

# SAVE ROUTES WITH MANEUVER ASSISTANT

1. For recording a new path, the driver selects “Record new path” from the parking menu in the infotainment system once the driver is at a desired starting point.
2. The driver can maneuver as often as needed and the system will track the path under a few conditions: no sharp steering angles, the distance is no longer than approximately 650 feet and the vehicle is going no faster than 9 miles per hour.
3. A path is saved by selecting the option “Save recording” under a custom name given by driver.

## ACTIVATING SAVED ROUTES

1. Once the driver is near a recorded path, a prompt will appear on the display screen indicating that the vehicle recognizes the parking route.
2. By pressing the “Play” button, the system is ready to assume guidance and park.
3. Once the driver releases the brake, the replay of the path starts. The center display screen will display the path that the vehicle intends to follow as well as the parking end position.
4. The driver must hover their foot over the brake while the MINI navigates along the recorded path. The system does not relieve the driver of personal responsibility for correctly judging the traffic situation, therefore surroundings must be monitored by the driver at all times while the vehicle parks.

# FREQUENTLY ASKED QUESTIONS

## 1. What is the Parking Assistant Professional?

Parking Assistant Professional offers features including Maneuver Assistant, Remote Control Parking, improved Back Up Assistant, and improved Automatic Park Assistant. These features help to maneuver your vehicle into parking spaces automatically. Guide your MINI to where you wish to park and optionally park the vehicle using the MINI App on your smartphone from outside of vehicle.

## 2. What are the requirements for Parking Assistant Professional?

Parking Assistant Professional is currently available for purchase as a MINI Connected Upgrade on model year 2025 and newer eligible vehicles, equipped with factory option 5DN (Parking Assistant Plus). To confirm whether this is available on your vehicle, visit the MINI Connected store at <https://www.miniusa.com/miniconnected>.

## 3. Will my parking maneuver be remembered ?

With the available Maneuver Assistant, your vehicle can automate up to ten parking routes. Each route must have a minimum of 20 feet to a maximum of 650 feet of traveled path.

## 4. Will Maneuver Assistant go on the same path if an obstacle arises or if the vehicle cannot fit?

The vehicle intends to follow the same route as originally recorded. In case of an appearing obstacle on a recorded path, there will be a possible slight deviation of maximum one foot from the original path to navigate around the obstacle as long as space allows.
