### **Quality improvement:**

- **Quality Improvements: Multimedia Display**

### **Notes on Remote Software Upgrade**

## Feature Upgrades: Distance setting adjustment by voice control

## Feature Upgrade: Enhanced Charging Screen Visibility

When the charging cable is plugged in and the vehicle is locked, the charging fullscreen now displays enlarged values that are also easy to read from outside through the windshield. This means you can keep an eye on charging progress at all times.

## Feature Upgrade: Charging with MINI App

## Feature Upgrade: Fast Charging

## Feature Upgrade: Hill Descent Control now in MINI Connected Plus

Connected Plus now includes Hill Descent Control for added stability on steep downhill drives. It automatically maintains a constant speed, providing greater control even on slippery surfaces, with automatic braking when needed. Available as a separate add-on.

## Feature Upgrade: Balance Mode

The Experience View in Balance Mode: a minimalist display complements the Balance Mode of your MINI with this upgrade. Nothing will disturb or distract your eyes. You are fully attentive in the moment.

## Feature Upgrade: Personal Mode

In Personal Mode, you simply upload your favorite picture as a background using a QR code. With this update, you will also see it in many other displays. This allows you to bring your own personal style to even more applications in your MINI.

## Feature Upgrade: Trail Mode

If you activate Trail Mode for off-road driving, your MINI now switches to a special view. With information on longitudinal and lateral inclination, steering angle, compass and more, you can navigate with greater control on uneven terrain.

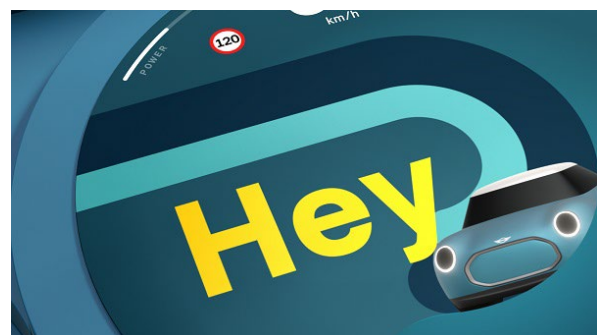

## Feature Upgrade: MINI now celebrates with you

Your MINI will surprise you with video animations on special occasions. Accompanied by sound and atmospheric lighting, this event becomes a unique interior experience. Simply tap the Let's Celebrate app before the start of a journey to start your surprise.

## Feature Upgrade: MINI Intelligent Personal Assistant

Speak naturally to the Personal Assistant in your MINI. Go to music, enter addresses or ask questions. This update takes speech recognition to the next level. You can control a range of functions entirely naturally with words while you concentrate on driving.

## Feature Upgrade: Guest Profile

With this update, the guest profile will no longer have access to mobile Internet via the built-in SIM card, and address data for automatic parking maneuvers will be hidden.

## Feature Upgrade: Green Mode offers a MAX RANGE function

This upgrade immediately increases the range of your electric MINI by 15 to 25 %. One touch of a button reduces the drive power. The speed is limited to 60 mph. Comfort functions such as air conditioning and seat heating are reduced.

## Quality Improvements: Multimedia Display

Updates include enhanced graphics for displays, buttons and text on screen. Additionally, the integration of Apple CarPlay and Android Auto has been optimized, and the stability of displays, along with smoother scrolling behavior, has been increased. The software for electrically seat adjustments has been improved.

## Notes on Remote Software Upgrade

This Remote Software Upgrade brings existing functions up to the latest technical standard. New functions depend on the equipment installed. You can find information on the equipment in the Owner's Manual of your MINI, from your service center or from MINI Connected Customer Relations.

As part of the update, installed MINI Connected apps and the Integrated Owner's Manual are automatically updated. Due to the update and the restart of some vehicle systems, control messages may appear, for example regarding malfunctions in the powertrain. Please check whether these messages are still displayed on subsequent trips. If this is the case, please contact your service center.

For MINI electric vehicles, charging processes may be interrupted and not restarted automatically if you perform the update while charging. Conversions or retrofits, engine tuning or special coding on the vehicle that have not been approved by BMW AG/MINI may be lost as a result of a Remote Software Upgrade or may lead to significant problems or even subsequent damage. Neither BMW AG/MINI nor the MINI service operations involved shall be liable for any resulting damage. After the installation has been carried out, the privacy settings may be reset to the factory settings. Please check the privacy settings after installing the new software. And please remember that driver assistance systems do not relieve you of your responsibility while driving.
