Special Note: MINI's Remote Software Upgrade

This Remote Software Upgrade brings existing functions up to the latest technical standard. New functions are equipment-dependent; information on your equipment can be found in the Owner's Manual in your MINI, from your service center or from MINI Connected Customer Relations.

As part of the upgrade, all installed MINI Connected apps and the Integrated Owner's Manual are automatically updated to the latest version. If control messages (e.g. parking brake, malfunction in the powertrain) are displayed, please restart the vehicle. If you perform the upgrade during charging, the charging process may be interrupted and may not continue automatically (only for BEV). Modifications/conversions or retrofits/engine tuning or special coding etc. to or in the vehicle that have not been approved by BMW NA ("BMW", "MINI") may be lost or lead to significant problems (including subsequent damage) during and after vehicle programming as a result of a MINI Remote Software Upgrade. Neither MINI nor any MINI service operation involved will be liable for any resulting damage.

Due to changes in the range of functions, the privacy settings may be reset to factory settings following installation. Please check your privacy settings after installing the new software.

Feature Upgrade: Optimized Bluetooth Connection Stability and Speed for Mobile Devices

This update significantly improves connection stability and speed between your mobile device and your MINI, reducing disconnections and enabling faster data transfer. To continue using features like telephone, Apple CarPlay, Android Auto, and music streaming, you'll need to manually reactivate your previously connected Bluetooth devices once in the Bluetooth list. For seamless eSIM use, complete a one-time contact sync by clicking the Telephony button in your personal eSIM settings.

Feature Upgrade: The MINI Intelligent Personal Assistant Now Understands Even More

Your MINI Personal Assistant now understands more commands than ever. For example, just say "Hey MINI" to operate the speed warning using voice control.

Feature Upgrade: Your Infotainment System Is Now Even More Stable

This update optimizes your MINI's infotainment system for greater stability and faster response times. Entertainment content now displays more smoothly, delivering an even better in-car experience.

Feature Upgrade: AC Charging Is Now Even More Reliable

This update improves the stability and reliability of AC charging, ensuring smoother and more consistent charging sessions.

Feature Upgrade: Filter Charging Stations Even More Easily

You can now filter charging stations in your navigation by availability. Activating the “Now available” filter shows only free and open stations, helping you quickly find charging points ready for use.

Feature Upgrade: Go-Kart Mode Becomes Exclusive JCW Mode

The Go-Kart Mode of your MINI John Cooper Works has now become JCW Mode. The design and the specific displays have been tailored for an ultra-sporty experience and are available exclusively in these models. All important information, such as acceleration and torque, remains available.

Feature Upgrade: Now Also Play Video Games with Selected Bluetooth Controllers in Your MINI

Connect up to two Bluetooth controllers from standard game consoles to your MINI and enjoy video games from the MINI ConnectedDrive Store. Available with the separately bookable MINI Connected Plus.

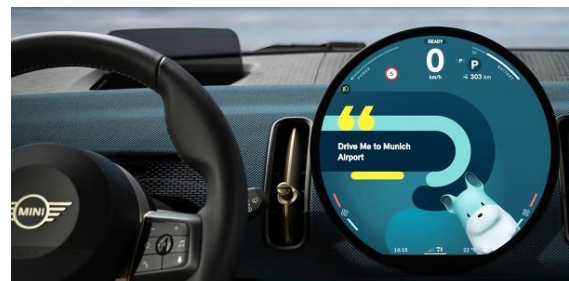

Feature Upgrade: Zoom Meetings Now Also Available via Video in Your MINI

You can now take part in Zoom video conferences while your MINI is stationary. When driving, video on the central display switches off automatically, and the meeting continues seamlessly via audio, resuming video when you stop. Download the Zoom app from the MINI ConnectedDrive Store. This feature is part of the separately bookable MINI Connected Plus.

Feature Upgrade: MINI Intelligent Personal Assistant Now Further Improved

With this update, the voice assistant responds even faster and understands you better. On the command "Hey MINI, open my window," for example, it recognizes whether the driver or front passenger is speaking and opens the correct window. If you have connected two telephones via Bluetooth, you can then access both phone books and contacts via voice.

Note: Shortly after the update, a new language package, which is necessary for using the assistant, will be automatically downloaded.

Quality Improvement: General Quality and Error Correction

This software update brings your MINI up to date, rectifies errors and prevents security gaps. For an improved driving experience. This update is recommended for everyone.
