

## Summary

### Feature Upgrades:

- Feature Upgrade: Amazon Alexa Car Integration
- Feature Upgrade: Charging Preparation
- Feature Upgrade: Digital Key Plus
- Feature Upgrade: Alarm Function
- Feature Upgrade: MINI Experience Modes
- Feature Upgrade: Personal eSIM

### Quality Improvement:

- Quality Improvement: Control Display
- Quality Improvement: Speech Recognition and Voice Assistant

### Special Note: MINI Digital Key

Please note: Immediately after this Remote Software Upgrade, the driver's door may not respond as usual for a few minutes. During this time, locking and unlocking will only be possible using the vehicle key or by tapping your smartphone on the door handle via NFC. After this one-time transition, the MINI Digital Key will be fully functional again.

### Special Note: MINI's Remote Software Upgrade

This Remote Software Upgrade brings existing functions up to the latest technical standard. New functions are equipment-dependent; information on your equipment can be found in the Owner's Manual in your MINI, from your service center or from MINI Connected Customer Relations.

As part of the upgrade, all installed MINI Connected apps and the Integrated Owner's Manual are automatically updated to the latest version. If control messages (e.g. parking brake, malfunction in the powertrain) are displayed, please restart the vehicle. If you perform the upgrade during charging, the charging process may be interrupted and may not continue automatically (only for BEV). Modifications/conversions or retrofits/engine tuning or special coding etc. to or in the vehicle that have not been approved by BMW NA ("BMW", "MINI") may be lost or lead to significant problems (including subsequent damage) during and after vehicle programming as a result of a MINI Remote Software Upgrade. Neither MINI nor any MINI service operation involved will be liable for any resulting damage.

Due to changes in the range of functions, the privacy settings may be reset to factory settings following installation. Please check your privacy settings after installing the new software.

### Feature Upgrade: Amazon Alexa Car Integration

With this upgrade, your MINI can now process voice commands when connected to your Amazon account. Using "Hey MINI," you can now issue voice commands that were previously only possible with Alexa. This new functionality is initially available for music search and streaming.

### Feature Upgrade: Charging Preparation

With this update, the "Prepare battery" icon appears not only when outside temperatures are cold, but also when they are warm. You are therefore always informed when the battery in your MINI has reached the ideal charging temperature. The icon is visible as soon as you have started driving on the route to a quick charging station and as long as the battery heat management for optimized DC charging is active.

### Feature Upgrade: Digital Key Plus

With this update, you can open and close the tailgate via the MINI App when near your vehicle. This option is available under "Remote Controls" and requires automatic tailgate option and the MINI Digital Key Plus.

### Feature Upgrade: Alarm Function

With this update, you can deactivate the alarm function using your MINI Digital Key Plus, helping to prevent unintended alarms caused by movement or vibration. This is especially useful when parking in a duplex garage or on a swaying ferry.

### Feature Upgrade: MINI Experience Modes

With this update, your MINI can automatically start and drive in Green Mode, eliminating the need to switch manually.

### Feature Upgrade: Personal eSIM

With this update, you can quickly set up a Wi-Fi hotspot in your MINI that uses the powerful external antennas of your vehicle. Optimized reception allows you to surf faster and make phone calls in top quality while on the move.

### Quality Improvement: Control Display

The overall performance, especially in the entertainment and control display area, will improve after this upgrade.

### Quality Improvement: Speech Recognition and Voice Assistant

Your MINI now automatically accesses contacts from the selected phonebook in the telephone app- no manual selections needed. Voice command recognition for "Drive me home" and "Drive me to work" have been improved, along with better detection when searching for radio stations using your voice assistant.
