- Feature Upgrade: MINI Intelligent Personal Assistant
- Feature Upgrade: Key Linking
- Feature Upgrade: MINI Connected Store
- Feature Upgrade: User Interface
- Feature Upgrade: YouTube Music

Information:

- Information: Alexa Car Integration
- Information: Radio Favorites

Notes on Remote Software Upgrade

This Remote Software Upgrade brings existing functions up to the latest technical standard. New functions are equipment-dependent; information on your equipment can be found in the Owner's Manual in your MINI, from your service center or from MINI Connected Customer Relations.

As part of the upgrade, all installed MINI Connected apps and the Integrated Owner's Manual are automatically updated to the latest version. If control messages (e.g. parking brake, malfunction in the powertrain) are displayed, please restart the vehicle. If you perform the upgrade during charging, the charging process may be interrupted and may not continue automatically (only for BEV). Modifications/conversions or retrofits/engine tuning or special coding etc. to or in the vehicle that have not been approved by BMW NA ("BMW", "MINI") may be lost or lead to significant problems (including subsequent damage) during and after vehicle programming as a result of a MINI Remote Software Upgrade. Neither MINI nor any MINI service operation involved will be liable for any resulting damage. Remember, driver assistance systems do not replace your responsibility while driving.

Due to changes in the range of functions, the privacy settings may be reset to factory settings following installation. Please check your privacy settings after installing the new software.

Feature Upgrade: Charging Points

Easily find available charging stations with enhanced charging-point details in navigation. Individual chargers at public charging locations are now displayed separately, showing their current availability and charging power, so you can quickly identify the best option—even at large charging stations.

Feature Upgrade: MINI Intelligent Personal Assistant

To continue using the enhanced MINI Intelligent Personal Assistant, complete a one-time setup and accept the updated Terms of Use by pressing the microphone button on the steering wheel. This ensures transparent and secure use while giving you access to the latest language features and an improved user experience.

Feature Upgrade: MINI Intelligent Personal Assistant

Enjoy an even more intuitive experience with the MINI Intelligent Personal Assistant. The optimized display and the voice assistant now appears in a compact view rather than full screen, allowing important information, such as navigation guidance, to remain visible and instantly accessible.

Feature Upgrade: Key Linking

Sharing your MINI with family or friends? Your MINI will now recognize the key and prompt you on the central display to assign it to your profile with a single tap. Once linked, your personal settings will be ready every time you drive.

Feature Upgrade: MINI Connected Store

The MINI Connected Store now features a new, more intuitive user interface. Enhanced visuals and clearer dialog boxes make navigation easier and more convenient. Booking upgrades for your MINI is now faster and simpler than ever.

Feature Upgrade: User Interface

Enjoy a refreshed user interface with enhanced clarity and usability. A more pronounced black frame and repositioned status displays make key information easier to view and access. Enhanced climate controls further improve visibility and usability, creating a smoother and more intuitive user experience.

Feature Upgrade: YouTube Music

YouTube Music provides the soundtrack for every drive. Enjoy your favorite songs, podcasts, and personalized playlists on the go. To do this, simply download the app from the MINI Connected Store and log in with your YouTube Music Premium account. The streaming service is available with the MINI Connected Plus and a YouTube Music Premium account.

Information: Alexa Car Integration

With this upgrade "Hey Alexa" Alexa Car Integration is no longer supported in the vehicle. Continue to use "Hey MINI" to access music, news, and other services.

Information: Radio Favorites

After the software upgrade, some saved radio favorites may need to be saved again. If "No Signal" appears when selecting a favorite, simply resave the station. Your favorites will then be available as usual.
